EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Tencza Jr. on October 3, 2005.

The application has been amended as follows:

In claim 1, line 12, "may" is deleted.

Non-elected claims 9-17 are canceled.

Allowable subject matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitations, in combination with the remaining elements disclosed in claims 1 and 8:

a memory; wherein a cutoff value representing an amount of accumulated operating time at which the lamp begin to operate improperly is stored in the memory; wherein an accumulated value representing an actual accumulated amount of operating time of the lamp is stored in the memory; wherein the processing system prevents the lamp from operating when the accumulated value is within a limit of the cutoff value, unless the processing system grants a request for a variance; wherein when the processing system grants a request for a first variance, the processing system allows

Art Unit: 2821

the lamp to operate after the accumulated value is within the limit of the cutoff value such as required by claim 1.

a memory, wherein an accumulated value representing an accumulated amount of operating time of the lamp is stored in the memory; and wherein a lamp life warning regarding any of the lamps of any of the plurality of image projection lighting devices is sent to the central controller to the attention of an operator without operator inquiry such as require by claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

IDS

Several references cited in the IDS dated 12-31-03 and 8-15-05 have been withdrawn from consideration because they fail to disclose any publication dates and author's names to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP 609.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Belliveau (6,605,907) discloses an image projection comprising similar structure but no double patenting rejection has been found between instant the application and the '907 patent. Hughes et al. (6,515,435) discloses a lighting system comprising a digital signal processor, a controller, a registry and a non-volatile memory

Art Unit: 2821

for detecting lamp faults and store the amount of operating time of the lamp but fails to disclose any lamp life warning regarding any of the lamps and cutoff time limit.

Pujol et al. (6,412,972) cited in IDS discloses a digital light protection apparatus with digital micromirror device and rotatable housing comprising a CPU for controlling the rotation. Perry (6,219,093) cited in IDS disclose an image projector comprising a CPU for controlling the motion and focusing the intensity. Jessl (6,099,128) cited in IDS discloses a beam projector comprising image generator for controlling the rotation of the X and Y axis, adjustment means for focusing lens and zooming the image. Washburn (5,399,947) discloses a dynamic color separation display comprising a timer and a signal processor for controlling the timing and processing signals to the image beam.

The prior art cited above do not disclose the claimed invention.
